

=====

* Thierry opens the general assembly and mentions 2 main points.

* The first point is about elections, the terms of 5 members

- Sebastien Destercke (Secretary), Fabio Cuzzolin (communication), Boutheina Ben Yaghlane, Thanuka Wickramaratne, Johan Schubert - expire in 2017. New elections will be prepared.

* The second point concerns the current number of members (221, including spring schools students and conferences attendants). 69 members last seen at the second conference (2012) have to renew their memberships before the end of the year.

* Arnaud makes a (third) point about the budget. Last school in Stella Plage had a positive balance, and so will surely be the 2016 Belief conference in Prague. The budget is approved. Discussions are then made about the possible uses of these earnings. Here is a summary:

- support students for conferences, schools, travels,
- joint action with other associations (isipta?)
- develop the communication to make the Belief society well-known and widespread,
- define important problems deserving a price if resolved,
- ...

This has to be discussed by the directorial board.

* Thierry speaks about the 2017 spring school, that will be a summer school, which will be held in July in Xi'an, China, just before the 20th fusion conference (FUSION'2007, Xi'an, China, July 10–13, 2017). Deqiang Han, member of the FUSION'2017 organization team, presents a video on Xi'an.

* BELIEF 2018: call for candidacies

* Last discussions on the possible actions the Belief society might undertake to promote belief functions (See the summary previously given about the use of the society earnings).
